About me

I consider myself a direct, focused, calm, adaptable, creative and very eager to learn.

My passion is game development. I have always been building and creating things as well enjoying gaming since I was a child. I used to design weird games in paper, which was the best part for me, convincing my friends to play them was the tough part.

As hobbies, I enjoy gaming as well as sports and other physical activities like running, climbing, playing sports and going to the gym. I am also passionate about cooking and baking, since they allow me to bring a slice of my culture with me.

Professional Experience

04/25-09/25 — Software Developer — Volkswagen Group Services, Lisbon

I was apart of a new team created to develop a fleet management solution for truck fleets. Working with Cloud, AWS, Java and Springboot framework. Helped design the application from the ground up and took initiative to organize and distribute tasks across the team.

10/24-12/24 — Software Developer — Veeam, Remote

Developed a new project to automate script manual labor. My responsibilities envolved designing from scratch a new architecture for the project as well as its implementation.

03/23-09/24 — Junior Software Developer — Sihot, Lisbon

I worked in a programming team where we developed features and maintenance for Sihot, a hotel management application built in C++ with custom frameworks for back and front end. I also developed side projects using .NET and Blazor in a fullstack role.

08/22-02/23 — Junior Backend Developer — Affinity Portugal, Lisbon

Developing features and maintenance for the application Keywork. I have mostly worked with .NET framework and database development using mySQL.

Academic Experience

2025- Now — Master's Degree — Uppsala University, Sweden

I am currently studying a program in Game Design to deepen my knowledge on the design process, to network and meet passionate peers. I have been quickly iterating through game making, participating in game jams and learning how to work in a design team.

2019-2022 — Master's Degree — Instituto Superior Técnico, Portugal

Graduate in Computer Science and Engineering with a specialization in Games. I developed my expertise in game development with courses in Game Design, Game Methodologies, Computer Graphics for games, Artificial Intelligence for games and Virtual Reality. This program provided me with great insight on what to do in game development and experience in the tools. My thesis was on a social AI system as a mod for Mount and Blade II Bannerlord, where I developed a system where the player could socialize with NPCs, gossip and find rumors. I had one paper published on a two player system for exploring communication with a set of puzzles. Exploring Bi-Directional Pinpointing Techniques for Cross-Reality Collaboration

2016-2019 — Bachelor's Degree — Faculty of Sciences, University of Lisbon, Portugal

Graduate in Computer Engineering. This program allowed me to understand most of the basics of programming, data management, application development. I achieved a Certificate of Academic Merit from my grades.

Extracurricular Experience

2025-2026 — Cafe Master — Uppsala University

Worked within the student union to run the student café. Helped with both baking and managing the café finances on a weekly basis as well as helping catering for events.

2025-2026 — Student Council Board Member — Uppsala University

I was apart of the student council within the Game Design department to help students on their study issues and help with organizing events.

2020-2026 — Game Jams

I have been participating on several Game Jams, I enjoy making a game quickly but for the most part I love to work with motivated and passionate people.
